Compass 🧭

Psychometric career guidance for young Indians (18–26)

India has 600M+ people under 25. Most of them make career decisions based on family pressure, peer pressure, or pure guesswork. Compass exists to fix that — a scientifically grounded psychometric assessment that maps who you are to what you should do.

Live at: compass-ashen.vercel.app

What it does

Compass runs an adaptive quiz that assesses personality, aptitude, and interests — then maps results to career paths suited to the Indian job market. Built with Next.js 14, Supabase, Gemini API, and Google SSO.

Why contribute?

25% of Compass equity is earmarked for open source contributors.

This isn't a token gesture. Top contributors who ship meaningful, merged work will be considered for formal equity allocation as the product grows. India needs this product. Help build it.

Beyond equity — this is a real, live product with real users. Your contributions ship to production.

What needs to be built right now

These are the highest-priority open issues. Pick one, comment on it, and start a conversation before opening a PR.

🔴 Critical bugs

- **Scoring engine broken** — currently returns a fixed score of 145 for all users regardless of answers. Needs a proper weighted scoring algorithm tied to question responses. (Issue #1)
- **Can't go back on questions** — users have no way to review or change a previous answer. Navigation between questions must be implemented. (Issue #2)
- **No question number shown** — users don't know where they are in the quiz. A simple progress indicator (e.g. "Question 4 of 20") is needed. (Issue #3)

Tech stack

- **Frontend:** Next.js 14 (App Router)
- **Backend/DB:** Supabase (Postgres)
- **AI:** Gemini API
- **Auth:** Google SSO
- **Hosting:** Vercel

How to contribute

1. Fork the repo
2. Clone it locally and run `npm install`
3. Set up your `.env` using `.env.example`
4. Pick an issue, comment that you're working on it
5. Open a PR against `main` with a clear description

All contributors must sign the Contributor License Agreement (CLA) before their PR can be merged. This is standard for projects where IP ownership is retained by the founder. The CLA will be linked here shortly.

Ground rules

- Be respectful, be direct
- No drive-by PRs — comment on the issue first
- Small, focused PRs are preferred over large rewrites
- If you're fixing something major, open a discussion first

Who's behind this

Mihir Desai — Founder. I set product direction, review PRs, and manage the roadmap. I'm not a developer, which is exactly why this is open source. I know what needs to be built; I need people who can build it.

Reach me: GitHub or raise an issue.
